

I can furnish you with what
sheep you want when it comes
winter or sleighing if you keep a
few sheep I thin they would do well
and you would be likely to get more
profit from them then you do from
turkeys I think that hens are more
profitable than turkeys you can raise
3 or 4 chickens where you can raise one
turkey it is no use to keep stock
when you cant get for it what it costs
to raise it and fat it even is high and
and will remain so for some time
I think I thin it is best for you to dispose
as fast as you can to advantage
