

3 O'clock P.M. George continues better and
has been tearing for News Papers to read
to day. I dont think there is any probability
of his reaching Harrower before the middle
of April - he will want to board at Capt.
Curtis when he gets there - you will of
course notify them. In the mean time
he wants to know minutely about your
studies & how you send him some
books in which the studies are taught
by D. Richardson all about them
he will not be able to study any for
some two or three weeks to come
if he does as well as we can
expect - send some of the most
important books. I do not expect the
Government will require him to make
up your present studies, but he can do
some thing before he is able to go on.
You must take special care of your
health - you will get down otherwise.
You or your Chum write often -
George says, send Horace & Rhetoric, as they
are small books, such as David can buy.
Perhaps he may not return here, of course
you will not send the books in that
case, unless you find some safe
opportunity - will at any rate -
