Auburn was incorporated as a town on 24 February 1842 and as a city on 22 February 1869. Auburn annexed land from the Town of Danville in 1859 and completely absorbed the remainder of Danville on February 26, 1867. It also annexed land from the Town of Minot on February 20, 1873. This is reflected in the listings of various post offices (e.g., Danville, East Minot) located in those annexed areas.

Researchers who wish to delve into the primary source records for the post offices listed below should also be aware that the area that is now included in the City of Auburn was part of Cumberland County until 31 March 1854, when Androscoggin County was established (with Auburn as the county seat). Therefore, when researching postal records from the National Archives, be aware that records from the earlier period will be found under Cumberland County, not Androscoggin County.

Briefly, the history of the 27 post offices in Auburn, in alphabetical order:

- 1. **Auburn (1)** was the first post office to bear that name. It was established on 5 March 1842 by renaming the former Nason's Mills Post Office, which had been established on 20 March 1833. Auburn (1) was renamed West Auburn on 27 December 1854. West Auburn closed on 15 April 1901. *(What does it mean when there is a (1) or (2) after the name of a post office? See the explanation near the end of this document.)*
- 2. **Auburn (2)** was established on 27 December 1854 by renaming the post office that had originally been called Goff's Corner (24 March 1825 to 18 July 1854) and then Lewiston Falls (18 July 1854 to 27 December 1854) before ultimately adopting the name of Auburn. This office, the city's main post office since 1854, is still operating in 2023, now on Rodman Road, four miles from the city center.

The office had originated as West Danville on 11 March 1850. Operating under the name of Lewiston Junction, it closed on 28 February 1907.
- 21. **Nason's Mills** (1) was established on 20 March 1833. On 5 March 1842, it was renamed Auburn (1) post office, which operated as such until 15 December 1854, when it was renamed West Auburn post office. West Auburn post office closed on 15 April 1901.
- 22. **North Auburn** was established on 7 June 1845 by renaming Centre Minot, which itself had been established by renaming East Minot, which had first opened on 29 December 1817.

- 24. **South Auburn** was established on 10 March 1868 by renaming the West Danville office, originally established on 11 March 1850. South Auburn was renamed Lewiston Junction on 9 July 1891 and closed on 28 February 1907.

Note: The area now included in the City of Auburn was part of Cumberland County until 31 March 1854, when Androscoggin County was established. When researching postal records from the National Archives, Ancestry.com, *Post Offices of Maine 2022*, and other sources, *be aware that records from the earlier period will be found under Cumberland County*, not Androscoggin County.

What does it mean when there is a (1) or (2) after the name of a post office?

Sometimes the numbers (1) and (2) appear after the name of a post office. These numbers indicate the (first) and (second) localities of post offices of the same name. If the post office name is used for two separate post offices in two respective villages at different times, they will be identified in this manner. These numbers do not necessarily indicate time periods.

These numbers do **not** represent numbered stations. Some larger places like Auburn, have postal stations with numbers. These are *not* the same thing as the post offices we call Auburn (1), Auburn (2), etc.

Also: the numbers do **not** appear in postmarks or any official post office publications, but are used by postal historians and collectors to refer to different post offices as noted above.
